

Response to Questions Received 3/19/18 on request for quotes:

Thank you for your call this morning and questions regarding the request for proposals/quotes on the Iron Horse Shelter & Bathroom. I would offer the following as a response to your questions:

1. The depth of concrete is to be a minimum of 5", not 5' 5". Thank you for pointing that out. An addendum is being posted on the website with the correction.
2. No soil testing will be completed by Fallon County. If your firm feels it is necessary, please include the cost in the proposal.
3. The information included in the request on the Fallon County website represent what we feel is an adequate amount of information for a contractor, with a minimal amount of on site due diligence, to present an informed quote to Fallon County. This project is estimated to be less than the \$80,000 threshold in MCA 7-5-2301, which requires competitive bidding. Fallon County is simply soliciting quotes or proposals for consideration via public notice in the newspaper vs. only reaching out to a few contractors for quotes.
4. The contractor that is selected will be responsible for securing any required permits. If you deem that requires additional effort or work or professional services, it should be included in your proposal.
