Subject: Landfill rules and regulations changes

Welcome to the Coral Creek landfill. Please read and observe the following tips and bits of information to ensure our policies are followed and your visit to the landfill goes as smooth and as safely as possible.

- Please be aware that the landfill may be shut down due to high winds, rain/mud, or other inclement weather. If the manager of the landfill makes that decision, it will be announced on the radio and on the landfill's Face book page. This is for your safety as well as the safety of my crew and equipment. Dumping a load of garbage is not worth someone getting hurt or having a truck slide into a pit. We will reopen as soon as the danger has passed and we repair the road. If the weather is bad, you can call the landfill manager and ask if it is open. 406-978-2734.
- Use of the landfill is at your own risk. If you get stuck please know that it is against Fallon County policy to use our equipment to pull out a truck. The landfill will not use our equipment to unload trucks, flip container, or lift items off trailers.
- The landfill hours are 7:30 am to 3:30 pm. We will not take any loads past 3:30.
- The landfill is operated by a small crew. We are not always in the office. If you need help please feel free to contact one of us. The list of our numbers is posted on the counter and the doors. We are also operating on CB Radio channel #1. Some regular drivers fill out the weigh sheets themselves. If you do please fill out the sheet as accurately and completely as possible. This includes time of delivery, drivers name, who it gets billed to, type of waste, state of origin, and of course the in and out weight. This is how we do our billing. It needs to be accurate.
- Please be observant of moving equipment and small vehicles. We utilize several UTVs as well as pickups for fueling equipment and litter control.
- Please observe all safety signs and caution lights. There is a tub grinder on sight. This machine has a large debris throw zone. There is a flashing light and warning signs 200' away from the machine. If the light is flashing you must wear a hard hat past that sign. There is to be no smoking past the scale building. No drugs or alcohol on site.

- White goods such as washers and dryers are accepted. They get dropped off by the green metal bin by the scale house. White goods such as refrigerators, freezers, and air conditioners must have a certification sticker on them stating the refrigerant has been removed by certified person.
- Pallets are free to dispose of at the landfill. They get ground to mulch and used for composting.
- All loads to the landfill must be secured and tarped. This has always been county policy. It is stated on the account setup sheet.

The contractor will be responsible for any litter from their incoming/outgoing loads. All loads are required to be covered while on the Coral Creek Road and at the landfill. All uncovered or unsecured loads will be charged double the current tipping fee for the uncovered/unsecured load.

Source: Landfill account setup sheet signed by account owner.

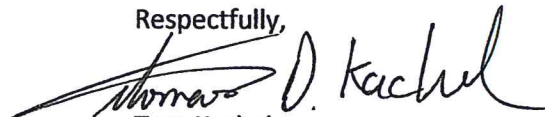

- When traveling to the landfill we ask that you use Coral Creek Road. We clean and maintain the road every Friday. Please be observant of our UTV and crew. Several landowners have contacted me about litter being dropped on Airport Road. This is a danger to their property as well as vehicles, livestock, and wildlife. If you lose something please pick it up. Unsecure / untarped loads will not be tolerated, and are subject to littering fines starting at \$500, refusal of loads, or double rate charges as stated in the account setup agreement. There are several traffic cameras in use along both roads to help control the littering issues.
- All material must be cut to a length no longer than 8'. We have had issues with pipe and lumber getting caught in our equipment and flying back into the cab. For the safety of my crew and equipment please cut large items into manageable pieces. Pipe, timbers, tree branches etc...
- Billing is done the first of every month. All the previous month's tickets are pulled from the account files. An invoice is generated with the month's tickets listed as well as a total amount due. The tickets as well as the invoice are then mailed out that same day.

Billing will be on a monthly basis. Payment in full is due within 30 days of billing unless prior arrangements have been made. A \$5 -or- a 1% finance charge (which ever is larger) will be added to the unpaid balance after 30 days.

Source: Account setup form signed by account owner.

- If a bill remains unpaid for 60 days a statement is issued reminding the account owner that it is overdue and you have 30 days to pay in full or make payment plans. Failure to do so will result in the account being suspended and turned over to the county attorney for collections at 90 days past due.

Respectfully,

Tom Kachel
 Administrator,
 Manager of Landfill Operations.
 Coral Creek Landfill.
